PLEASE RETURN FORMS TO THE SCHOOL OFFICE AT SCPS ON/BEFORE Monday, April 30th, 2018 IF PARTICIPATING IN THIS SCREENING

Dear Parent / Guardian: February 22, 2018

Enclosed you will find the athletic pre-participation screening packet that is required of all students trying out for and/or participating in a school sport during the 2018-2019 school year. If your child is interested in playing a school sport next year, or participating in an Upper School PE class or the marching band, we strongly recommend that you take advantage of the upcoming Pre-Participation Screening (PPS) that will be taking place on Wednesday, May 2nd, 2018. The screening will begin at 2:00 for the lower school, followed by the upper school and middle school. These screenings will occur in the Eckburg Gymnasium. The PPS is being jointly conducted by Memorial Sports Medicine, Memorial Family Practice, Chatham Orthopedics, and the SCPS athletic department. The cost of the screening is \$15.00 cash or check made payable to SCPS. All funds collected from the PPS will go directly to your school's athletic department to help defray costs for athletic training supplies. This screening will be valid through the end of the 2018-2019 school year, and will be kept on file at the school.

If your child will be participating in the PPS, please completely fill out the Emergency Contact & Insurance Information, Permission and Medical Release Form, SCPS Medication Consent Form, SCPS permission form, and Pre-Participation Physical Evaluation-History portion (page 9), as well as the first line of page 10. It is extremely important that this packet is completed, signed by you and the student-athlete; and returned to the Athletic Trainer or School Office by Monday, April 30th. This will expedite your child's PPS process and ensure that s/he gets through the screening in a timely fashion. Incomplete information or missing signatures could disqualify or delay your child from our screening process. This means that you will have to arrange for your child to receive a PPS/Physical by your own means.

If your child is unable to attend the screening on May 2nd, 2018, you may have your child's physical completed by your personal physician. Please note that pages 1-8 need to be completed by you and pages 9-10 must be completed and signed by a Licensed Medical Physician or Doctor of Osteopathic Medicine. Once the packet is completed by the physician, please return it to school office so that it can be filed properly. All physical packets are due **before** the first day of practice of your child's sport.

Be aware that the PPS on May 2nd, is not the same as a regular physical exam administered by your family physician. It is a screening to ensure that your child is medically eligible for participation in accordance to Georgia High School Association guidelines. Memorial Sports Medicine recommends that every child receive a regular physical exam from his/her primary care physician to ensure general good health. *If your child currently takes a prescription medication or has a medical condition, please have the treating physician send a clearance note stating your child is able to participate in athletics while under their care.* Furthermore, if your child has any of the following conditions, they <u>MAY NOT</u> be cleared to participate in athletic activities until they receive a clearance letter from a primary care physician:

- Asthma, any diagnosed heart conditions, unusual or elevated Blood Pressure readings,
- History of diabetes or Sickle Cell Trait/Anemia
- History of multiple concussions
- Athletes with certain prescription medications
- Any medical conditions in need of further medical review

We strongly encourage every student who is slightly interested in trying out for any sport to take advantage of this opportunity. If you have any questions about any part of the screening process or about athletic physicals in general, please feel free to contact Ansley Hendrick, MS, LAT, ATC at **ahendrick@savcps.com**. Thank you for your cooperation in this matter and we look forward to working with your student-athlete this coming school year.

Sincerely,

Ansley Hendrick, MS, LAT, ATC Memorial Sports Medicine Athletic Trainer

GHSA: HEAT & HUMIDITY POLICY

Heat and Humidity Awareness:

GHSA has a statewide practice policy for extremely high heat and humidity that list guidelines for monitoring the heat during sports that occur in the warmer months. This includes practices, games, and voluntary conditioning.

GUIDELINES FOR HYDRATION AND REST BREAKS:

- Rest time should involve both unlimited hydration intake (water or electrolyte drinks) and rest without any activity.
- For football, helmets should be removed during rest time.
- The site of rest should be a "cooling zone" and not in direct sunlight.
- When the WBGT reading is over 86:
 - Ice towels and spay bottles filled with ice water should be available at the "cooling zone" to aid the cooling process
 - Cold immersion tubs must be available for practices for the benefit of any player showing early signs of heat illness.

Please refer to BY-LAW 2.67-GHSA Practice Policy for Heat and Humidity for more details: http://www.ghsa.net/sites/default/files/documents/sports-medicine/HeatPolicy2013.pdf

It is recommended that all guidelines be followed in such a way that the best interests of our students be made our number one priority. It is also recommended that coaches constantly teach our students about proper hydration throughout each day. It is important that student-athletes be allowed to carry water with them during the day and hydrate themselves, on days of practices and games, while the weather has the possibility of reaching critical levels in relation to the heat and humidity.

Memorial Sports Medicine CONCUSSION AWARENESS INFORMATION AND GUIDELINES

The purpose for this document is to provide crucial information for student-athletes and parents/legal guardians. This form must be signed by both the athlete and parent/legal guardian prior to tryouts, workouts or other forms of participation.

Concussion Awareness Information:

Concussions at all levels of sports have received a great deal of attention and a state law has been passed to address this issue. Adolescent athletes are particularly vulnerable to the effects of concussion. Once considered little more than a minor "ding" to the head, it is now understood that a concussion has the potential to result in death, or changes in brain function (either short term or long-term). A concussion is a brain injury that results in temporary disruption of normal brain function. A concussion occurs when the brain is violently rocked back and forth or twisted inside the skull as a result of a blow to the head or body. Continued participation in any sport following a concussion can lead to worsening concussion symptoms, as well as increased risk for further injury to the brain, and even death.

COMMON SIGNS OF A CONCUSSION:

- Headache, dizziness, poor balance, moves clumsily, reduced energy level/tiredness
- Nausea or vomiting
- Blurred vision, sensitivity to light and sounds
- · Fogginess of memory, difficulty concentrating, slowed thought processes, confused about surroundings or game assignments
- Unexplained changes in behavior and personality
- Loss of consciousness (NOTE: This does not occur in all concussion episodes.)

Please refer to BY-LAW 2.68-GHSA Concussion policy for more details:

http://www.ghsa.net/sites/default/files/documents/sports-medicine/2013GHSAConcussion Form.pdf

Student-Athlete Concussion/Head Injury Guidelines:

I affirm that:

- It is my responsibility as a student athlete or as the parent/legal guardian of a student athlete to report all injuries and illnesses to my Athletic Trainer or Memorial Sports Medicine representative.
- I have fully disclosed, in writing, all prior head injury related events and medical conditions and will disclose any future conditions to my Athletic Trainer or Memorial Sports Medicine representative.
- I understand the importance of and will immediately report any and all signs and symptoms of a head injury, including concussion, to the Memorial Sports Medicine representative or my Head Coach.
- I understand there is the possibility that participation in any sport may result in a head injury and/or concussion.
- I may be provided with the Heads Up-Concussion Fact Sheet / NCAA Concussion Fact sheet for student-athletes upon request
- If there are questions or I wish to discuss any areas and issues that are not clear to me concerning head injuries, I have the contact information of a Memorial Sports Medicine Athletic Trainer.
- I acknowledge that no piece of equipment can prevent injury/illness/concussion. Specifically, helmets or soccer headbands may help to prevent catastrophic head injury but do not significantly reduce the risk of a head injury, including concussion. I understand that it is my responsibility to wear (or to ensure the student-athlete wears) any equipment issued to me (or the student-athlete) in the appropriate manner.
- I agree to read and abide by all warning labels on any equipment before use.
- I have read and reviewed the following statement released by the National Operating Committee on Standards for Athletic Equipment (NOCSAE)
 - Helmet Warning Statement (For those student-athletes who will play football at any level):
 - "Keep your head up. Do not use this helmet to butt, ram, or spear an opposing player with any part of this helmet or faceguard. This is in violation of football rules and such use can result in severe head or neck injuries, paralysis, or death to you and possible injury to your opponent. No helmet can prevent all head or neck injuries a player might receive while participating in football."

BY SIGNING I AFFIRM THAT I HAVE READ THIS FORM AND I UNDERSTAND ALL THE FACTS PRESENTED IN IT.

I have examined the above-named student and completed the preparticipation physical evaluation. The athlete does not present apparent clinical contraindications to practice and participate in the sport(s) as outlined above. A copy of the physical exam is on record in my office and can be made available to the school at the request of the parents. If conditions arise after the athlete has been cleared for participation, the physician may rescind the clearance until the problem is resolved and the potential consequences are completely explained to the athlete (and parents/guardians).
